

Java

```
class Solution {  
    public long maxTotal(int[] nums, String s) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {number[]} nums  
 * @param {string} s  
 * @return {number}  
 */  
var maxTotal = function(nums, s) {  
  
};
```

TypeScript

```
function maxTotal(nums: number[], s: string): number {  
  
};
```

C++

```
class Solution {
```

```
public:
    long long maxTotal(vector<int>& nums, string s) {

    }
};
```

C#

```
public class Solution {
    public long MaxTotal(int[] nums, string s) {

    }
}
```

Kotlin

```
class Solution {
    fun maxTotal(nums: IntArray, s: String): Long {

    }
}
```

Go

```
func maxTotal(nums []int, s string) int64 {

}
```
